Colonel H. E. Dewey, Retired, called Mr. Skrinde and informed him that the Skagit County Board of Commissioners is working on the establishment of a county-wide Flood Control District. Mr. Dewey stated that he would call again early next week to obtain information on a possible construction schedule for the levee and channel improvements on the assumption that a district can be organized and local requirements can be met by 1 January. He also wants to know details on the timing that local interests require to have local funds in hand for the levee and channel improvements project.
