15 May

MEMO FOR: RECORD

SUBJECT: Skagit Levee and Channel Improvement Project - Meeting with  
Skagit County Personnel

On 15 May 1978, Messrs Brooks, Erlandson, and Williams met with Mr. Ray Skrinde and Mr. Don Nelson of Skagit County to discuss the surveys we have completed and the methods Skagit County could use to locate property along our levee alignment. Mr. Erlandson gave them copies of sheets 1-5, 9, and 10 of our worksheets (scale 1"=400') for the project and a computer printout of the coordinates for our Skagit River levee survey baseline. Mr. Nelson will use the information to tie section corners to the levee alignment. We will provide him with our worksheets for the phase II effort (scale 1"=100') when they are available. Mr. Nelson asked when we needed the diking/drainage questionnaires returned. I told him we could use them as soon as it was convenient for him to collect and return them.
