

LETS NOT FLOOD SEDRO WOOLLEY

JUL 21 2014

To whom it may concern including the army corps of engineers and skagit county public works.

My family and I have lived in south Sedro Woolley for over 45 years. It has never flooded in the surrounding residential area in that time or ever that I am aware of.

If the army corps of engineers and the county decide to raise the dikes around Burlington, is this a wise decision for south Sedro Woolley residents? A complete study should be done before attempting any such undertaking

I made a decision to live here based on many things , NOT being flooded out would be one of them.

Please reconsider raising the dikes to save some so others can be in harms way.

We all made a decision to live and build based on the facts at that time. Don't change the facts to benefit some.

Thank You
