Skagit River General Investigation Study

Project Purpose:

The purpose of the Skagit River General Investigation (GI) Study is to identify the problems and opportunities that exist to reduce flood risks and to develop a flood risk management plan

Public Scoping Meeting Objectives:

- Inform interested community members and stakeholders about the Skagit River GI Study and the National Environmental Policy Act (NEPA) process
- Engage the public in the NEPA scoping process through a formal public hearing
- Gather comments from the community
