Subject: Working Group Wrap up report

Val,

Ed Capasso brought up that he thought you were going to provide a summary report for the working group. Dave, Chal and I think that is a grand idea. I know its a bit more work for you but I think the budget allows it. Let me know what you think. The report doesn't have to be elaborate. Maybe four or five pages or so. I liked what you prepared for the signatures and I think Dave did too. We are making plans for a celebration and will keep you informed on the details.

I guess you can chalk up another success story. Everyone here seems pretty happy. I have to tell you that the Corps is evaluating one more alternative. I told Stephen that we needed to be careful about that. He is sometimes kind of insensitive to the process. I think the working group would have a fit if they knew. I plan on letting them know when I find out more. The other alternative is one that Terry Stevens thought up. Its a bypass from the River Bend area to the North Fork. I think its not a good idea cuz you cut through prime farm land and put too much water into the North Fork rather than splitting the flow. Oh well. Thanks for the invoice - Pam got it faxed to me this morning. We'll get you paid shortly. I'm sorry for the confusion.

Jackie
