

Sedro-Woolley, Wash.  
June 21, 1923.

Mr. James E. Stewart,  
United States Geological Survey,  
406 Federal Bldg.,  
Tacoma, Wash.

Dear Sir:

I am in receipt of your letter of the 12th, and am pleased to give you as much information as possible.

The Winter floods previous to the Spring Flood of 1894 was about 2 feet higher, but they were never as high or no indications of them being so, excepting the one big flood the Indians tell about. The Winter Floods since that time (1894) were always higher. The more they diked the river close to it, the higher the floods have been.

Any other information I can give, would be glad to do so.

Yours truly,

Mr. Joe. Hart.

By *J.H.*
