

June 17, 1953

Cir. 191

Larry:

Corps of Engrs

Norman McDonald called and said they were concerned about revisions in their State Bulletin which were put in there (by Murphy).

The one for Skagit River at Mt Vernon was one of these.

It showed in the Bulletin 210,000 cfs Dec. 13, 1921 for that peak and Murphy has tried it out showing another figure.

Will you call him and straighten it out.

I thought it may have come from the Stewart Bodhaine report.

Bill.

MU 2 2700 FY 476

I called on July 24, 1961 and told him to use the original figures. The suggested revisions were dropped after further analysis.
