Mr. H. O. Walberg
County Engineer, Skagit County
Court House
Mount Vernon, Washington

Dear Mr. Walberg:

The Seattle District is reviewing its maps of the Skagit Valley in order to incorporate thereon any data which might be of assistance during flood-fighting operations. Accordingly, maps of the lower Skagit River are inclosed, and it is requested that your office have placed upon them the current boundaries, number or name of each drainage, diking, or flood-control district in Skagit County. Please return the maps to this office when these data have been placed upon them.

If you already have a map containing these data, a copy would be appreciated in lieu of the preceding request.

The Seattle District is also interested in correlating flooding in Skagit County to U. S. Geological Survey's recording gages on Skagit River. Accordingly, the following information is requested for the towns of Mt. Vernon, Burlington, Sedro Woolley, and Hamilton:

- a. Stage of the river (to a given datum) at which serious damage begins.
- b. Stage of the river at which 50 percent of each town is flooded.

Your early reply will be of considerable assistance in the assembly of up-to-date flood-fighting data.

Very truly yours,

E. C. ITSCHNER
Colonel, Corps of Engineers
District Engineer
