Subject: RE: What Exactly Would You Like Me To Do?

Michael,

Please do not stress over this. What I would like you to do is to go over the kinds of environmental studies that you think could be needed for each of the alternatives. I have seen a document that I think you put together that I would like you to present. I would also like you to inform the group of the plan to involve Ron Thom and a little about his background. I will try to call you later today to discuss this further but this, in a nutshell, is all I was thinking of having you do. You do not need to feel pressured to fill the whole time. Your presentation is intended to stimulate conversation regarding environmental studies and as a segway into discussing a matrix that Stephen and I have been working on. The matrix is attached for your information. The facilitator will lead the group through the matrix - you don't need to worry about that. I hope this helps.

By the way, this is not the latest and greatest version of the matrix. Perhaps Stephen can forward you a more current file of the matrix?

Sincerely,

Jackie

Valerie and Jackie,

I don't have a problem putting something together for the meeting, it just would have been nice to get the request a little earlier than the last minute. I should have one day to actually work on it since I committed to field visits for the other days.

The ball's in your court, you should respond rapidly.

Mike
