OUR RESOURCES ARE MANY

A SPLENDID POOR MAN'S COUNTRY

Work is Plentiful at All Times and Wages are Always Good

What Skagit county needs is more people to develop the great rich fields which spread off every hand. There is not a country on earth where so many rich stores await the hand of toil and there is not a land extant where the poor man can so nicely get along and soon be in easy circumstances. Skagit county is one vast field of richness, producing the greatest hay, grain, vegetables and fruits to be found anywhere and once this becomes known to the eastern man who is seeking a home, it will be only the matter of a very few years until this whole country will be alive with industrious men, building homes and developing the great resources which surround them. Our county needs advertising we must place before the people that which we have for sale. Let the home seeker know that we have lands which he can purchase, let him know that our lands produce, that they are prodigal of yield, that we raise fine hogs, sheep, cattle, poultry and have the greatest dairy farming country beneath the monarch sun. These are the essentials which count and once we locate a few good men, others will have a county densely populated. Our schools will increase in importance, our assessed valuation will increase, the lands will be developed, orchards will be planted, berry vines will be put out, fields of clover dotted

with fat cattle will greet the eye and Puget Sound will indeed be a great country.

Let the eastern people know that we have a land of perfect health, that we have no heat or cold to the extreme, just an even, pleasant climate where health is catching and nature has a bountifully blessed the country with scenic mountains, sapphire seas, fantastic forest, green islands, and crystal lakes. Let this be known and Skagit county will not be long in claiming her own.
